# **Graphic Designer** SENIOR

NİYAZİ **Tanyıldız** 

Passionate about design, coding and astrophysics. I believe in that the arts will save the world and humanity.

Hey!

I was born in 1975, in Bursa, Turkey. I'm married and have 2 kids. Not also my family, but also I love linguistics and astrophysics. I was graduated from Bulgarian Language and Literature in Ankara University and from Web Design and Coding in Anadolu University.

I'm working as a designer since 1993. I've worked for various adagencies and print-offices in different cities. I've created many designs as printed and digitally, like from a logo to corporate identity or from a business card to web site. I taught Adobe products for 2 years in an institution.

I always wanted to be a developer. The last decade I'm trying to learn Swift. But first of all I learned Phyton. After that I continued with HTML/CSS/JavaScript. I loved Ruby on Rails and ReactJS. But my aim is to be a real Swift developer. I joined in many video courses, bought books, solved some problems in hackerrank.com, and I'm reading articles daily at Medium, or related web sites.

The last 2 years, I'm working in a medical products manufacturer. Besides graphic designs, I also set some wordpress sites up. And sometimes, I applied for a junior developer to some companies. But because of lacking experience, I guess, I was rejected every time.

So I haven't give up yet. Because I have patient and enough desire for coding. I believe someone will give me an opportunity, so that i'll change my career.
