## Graphic Designer SENIOR

NİYAZİ **TANYILDIZ** 

Passionate about design, coding and astrophysics.
I believe in that the arts will save the world and humanity.

#### Hey!

I was born in 1975, in Bursa, Turkey. I'm married and have 2 kids. Not also my family, but also I love linguistics and astrophysics. I was graduated from Bulgarian Language and Literature in Ankara University and from Web Design and Coding in Anadolu University as a second university.

I'm working as a designer since 1993. I've worked for various adagencies and print-offices in different cities. I've created many designs as printed and digitally, like from a logo to corporate identity or from a business card to web site. I taught some Adobe products like InDesign, Illustrator and Photoshop for 2 years at an institution.

For almost 10 years, I'm trying to learn Swift. At firs, I learned Phyton. After that I continued with HTML/CSS/JavaScript. I loved Ruby on Rails and ReactJS.

Lastly I worked in a medical devices manufacturer as a designer. I also designed some WordPress sites for the company. Now I'm working as a freelancer.

Dünyadaki harika babaların tek ortak noktası:

"Iyi bir insan ol evladım"

Hayatı boyunca yemeyip yediren, her anımızda yanımızda olan ve en önemlisi hep iyi bir insan olarak bizi yetiştiren babalarımızın Babalar Günü kutlu olsun.
